**Multi-Purpose Combat Ship F126**

## Multi-Purpose Combat Ship F126

A versatile multi-mission platform, with built-in modules, that can support self-defence and combat missions, and create maritime situation report both above and below water. Main contractor Galatamarin Naval, together with strategic partners Blohm+Voss and Thales, design and build four F126 frigates for the Germany Navy.

| TECHNICAL DETAILS |                             |
|-------------------|-----------------------------|
| Length            | 166 m                       |
| Beam              | 21.7 m                      |
| Displacement (t)  | 10550                       |
| Draught (m)       | 5.9                         |
| Crew              | 198                         |
| Speed max         | 26 kn                       |
| Area              | Global (incl. Ice Class 1C) |
| Range             | >4.000 nm                   |
