Search and Rescue Vessel 4207

Search and Rescue Vessel 4207

The SAR 4207 is fully equipped and optimised for SAR duties in coastal waters and offshore. Fitted with daughter craft, specialised sensors and communication systems can also be added as required. The positions of the working areas on board are well aft, where the ship motions are least, thus improving working conditions and decreasing crew fatigue. Slender hull lines produce great seakeeping performance and low resistance, which in turn results in low fuel consumption.

TECHNICAL DETAILS	
Length	42.8 m
Beam	7.1 m
Draught max	2.5 m
Hull construction	Steel
Propulsion	2 x CPP
Survivors	50 - 100 pers
Speed max	26.5 knots
Range	Up to 2500 nm
