PASSENGER CRAFT/ FERRIES

Waterbus 2407

Waterbus 2407

The modular design is suitable for a large variety of applications. Galatamarin water buses can be deployed as taxis, sightseeing boats, commuter ferries, for dinner cruises and many other uses. The Galatamarin Waterbus can be customised in many different ways. Customers can specify the passenger capacity, bicycle and cargo space, entertainment, top speeds, climate control options, different colours and liveries, advertising and more. The fully-engineered composite structure embodies years of operational experience and testing, resulting in a strong and lightweight hull and superstructure.

TECHNICAL DETAILS	
Length	24.5 m
Beam	7 m
Depth (m)	2.3 m
Speed max (kn)	21.6
Passengers	100
Main engines	2x Volvo IPS 2-650 / D11
Total power	2x 375 bkW @ 2250 RPM
Propulsion	2x Volvo IPS-2 system
